

## **Appendix F:**

### **Income Eligibility Guidelines for Illinois Solar For All**

The Act states that for the Illinois Solar for All Program, “low-income households’ means persons and families whose income does not exceed 80% of area median income, adjusted for family size and revised every 5 years.”<sup>1</sup>

The Agency proposes to use income eligibility guidelines from the US Department of Housing and Urban Development (HUD). HUD bases its housing assistance programs, such as the Section 8 Housing Choice Voucher program on 80% of area median income.<sup>2</sup>

Because the Act does not define “area,” the Agency is proposing to use HUD’s definition of an area as a Metropolitan Statistical Area (MSA), a Fair Market Rate (FMR) Area, or a county not in an MSA or FMR. There are 20 MSAs and FMRs, and 62 other counties in Illinois.

Income eligibility levels are shown in Table F-1, for each geographic area. Table F-1 also shows income levels for participation in the Low Income Home Energy Assistance Program (“LIHEAP”) and the Illinois Home Weatherization Assistance Program (“IHWAP”). These programs are managed by the Illinois Department of Commerce and Economic Opportunity (DCEO).

For LIHEAP and IHWAP, annual eligibility levels are determined based on available funding and may not exceed 200% of the federal nonfarm poverty level. Levels are set by household size, and are measured by monthly or annual income, with additional provisions for renters. The table lists 2023-2024 program year values for annual income, as set by DCEO.<sup>3</sup>

Eligibility in LIHEAP or State funded IHWAP could be a proxy for eligibility for Illinois Solar for All because there is much, though not complete overlap of eligibility with the 80% of area median income for all regions of the state. However, for both LIHEAP and IHWAP, not all counties, MSAs, or FMRs have an area median income of 80% that is below the eligibility level for those programs. For the counties and areas listed below that are shaded, participation in those programs could not be used as a proxy for eligibility in Illinois Solar for All. The Program Administrator still allows participants to verify their income using LIHEAP and IHWAP eligibility, however additional confirmation is sought from DCEO when 200% FPL is higher than the 80% AMI of the participant’s area.
